SUMMARY

.NET Developer with over 1+ year of experience in backend development, database management, and API integration. Skilled in C#, ASP.NET Core, and SQL Server, delivering optimized, secure, and scalable web applications. Seeking to apply technical expertise in innovative development environments.

EXPERIENCE

JR. Software Engineer

Sep '25 — Present

Enhanced Software Solutions Pvt. Ltd.

Thane, India

- Developed and maintained ASP.NET MVC applications with Entity Framework for data access and management. Implemented document upload, retrieval, and storage modules, ensuring secure handling of sensitive healthcare records.
- Debugged code, fixed bugs, and resolved production issues to ensure high application performance and stability.
- Designed and implemented new modules and features based on business requirements using ASP .NET MVC, and SQL Server. Worked on user authentication and role-based login modules to ensure data privacy and system security.
- Collaborated with team members for code reviews, testing, and deployment

JR. Software Engineer

May '25 — Aug '25

3Di Systems Solutions Pvt. Ltd

Navi Mumbai, India

- Debugged and resolved critical issues in .NET-based web applications, boosting system reliability by 30% and improving performance by 25%
- Conducted code reviews to ensure high-quality, maintainable code, adhering to industry best practices. Managed and optimized PostgreSQL databases, resulting in 40–70% faster data retrieval and enhanced query performance.
- Collaborated with teams to troubleshoot and resolve technical issues, ensuring seamless application functionality.

Software Engineer

Mar '24 — Mar '25

Zentech Info Solutions Pvt Ltd, | Software Engineer

Thane, India

- Promoted to Software Engineer within 9 months based on exceptional performance and key contributions to project success.
- Developed and optimized backend services using ASP.NET Core Web API and ADO.NET, improving application scalability by 40% and database query efficiency by 25%.
- Implemented authentication mechanisms (Basic Authentication, JWT), enhancing security by 30%, and proactively resolved critical bugs, increasing system reliability by 95%. Integrated email & SMS notifications to streamline communication workflows, boosting user engagement by 20%.
- Gained comprehensive knowledge of Azure services, including Azure App Service, Virtual Machines (VMs), and Azure Container Services, enhancing cloud deployment and management capabilities.

EDUCATION

Bachelor in Computer Science, Satish Pradhan Dnyanasadhana College (GPA: CGPA: 8.28)

Jan '19 — Dec '22

Thane, India

CERTIFICATIONS

Course in Software Programming Java, G TEC JAIN KEERTI EDUCATION

.Net Fundamentals, Great Learning

PROJECTS

OTTER(Oil Tank Testing and Registration), 3Di Systems Solutions Pvt. Ltd

Oct '24 — Present

Navi Mumbai, India

- This project involves the management and maintenance of oil tanks under the oversight of the OH USA government, ensuring compliance with all regulatory requirements and operational standards. It encompasses all necessary formalities for efficient and safe operations.
- The system streamlines the entire inspection process—from scheduling and conducting inspections to generating detailed compliance reports.
- **Technologies Used:-** C#, ASP.NET CORE, ASP.NET MVC, JavaScript, jQuery, Entity Framework, PostgreSQL

HELLO PRODUCT, Zentech Info Solutions Pvt Ltd

Mar '24 — Present

- Developed and enhanced a Workplace Management Solution for corporate and commercial spaces, providing seamless seat & meeting room booking, visitor registration, parking management, and security tracking.

- For corporate offices, the system enables remote employees to book seats and meeting rooms in advance and check in using QR code validation.
- For commercial spaces, the Visitor Management Module facilitates pre-registered and walk-in visitor check-ins through QR codes, self-service kiosks, and temporary pass assignments. Parking slot reservations further enhance accessibility.
- **Technologies Used:-** C#, ASP.NET Core Web API, Angular, ADO.NET, MS SQL Server, Azure

Customer Portal, Enhanced Software Solutions Pvt. Ltd

Mar '24 — Present
Thane, India

- Developed a Healthcare Customer Portal enabling secure upload and management of licenses, permissions, and medical documents with a hierarchical approval workflow.
- Implemented Vendor Management features allowing clients and users to manage and view vendor details through a centralized dashboard.
- Built the application using ASP.NET MVC and C#, with Entity Framework and SQL Server for efficient data handling and validation.
Designed responsive UI using HTML, CSS, Bootstrap, JavaScript and deployed the application on IIS.
- **Technologies Used:-** C#, ASP.NET MVC, Entity Framework, ADO.NET, MS SQL Server, HTML, CSS, Bootstrap, JavaScript
